

CLAIM OR CLAIMS

WHAT IS CLAIMED IS:

- Sub B1
- 5 1. A display of signal characteristics for multiple channels/codes within a region of interest comprising a status ribbon having a plurality of stripes, each stripe representing at least one channel/code within the region of interest and having a trait representative of a value for the at least one channel/code.
 - 10 2. The display of claim 1 wherein the trait represents a measured value for a signal parameter of the at least one channel where the region of interest is a frequency range having multiple channels.
 - 15 3. The display of claim 1 wherein the trait represents a condition for a signal parameter of the at least one channel where the region of interest is a frequency range having multiple channels.
 4. The display of claim 3 wherein the condition is selected from the group consisting of pass and fail.
 - 20 5. The display of claim 3 wherein the condition is selected from the group consisting of pass, caution and fail.
 6. The display of claim 1 wherein the trait is color.
